

COMPANY POLICY

4C INNOVATION is an Italian company that produces innovative products for the marine industry.

The company was founded with the goal of combining tradition with innovation, based on its experience in the field of electrical and electronic components for the nautical industry.

“We believe in people, and for people we will always work to find technologically and aesthetically innovative solutions. We want to satisfy our customers with our professionalism and reliability.”

4C INNOVATION's products are designed to improve the quality and safety of life on boat. The company focuses on the high quality of its products and services, placing the needs of the customer at the core of its attention.

4C INNOVATION has a strong relationship with its partners and is committed to providing high-quality customer service, from the production process to after-sales service.

The mission is to provide innovative and technical products, tested according to a rigorous process, that work reliably even in the extreme conditions typical of marine life.

The company has chosen to embark on the path to ISO 9001:2015 certification to attest to its high quality. 4C Innovation has chosen to pursue ISO 9001:2015 certification to attest to its high quality.

The scope of the quality management system is the design, production, and sale of marine technical products, such as: navigation lights, underwater lights, backlit boat names, intercom systems, and cable reels.

The company has drafted a document to define its quality policy, health and safety at work and, more generally, guidelines for its activities.

The document will be displayed in the company's premises and on the website, so that anyone can read it.

QUALITY

The Quality Policy is established as the Management's commitment to operate according to the requirements specified by the UNI EN ISO9001:2015 standard.

4C Innovation s.r.l. guarantees the quality of its products and services through a rigorous control system that involves all phases of the company's activity.

The control system is based on well-planned procedures, competent employees, and specialized suppliers.
